that could be correct. I really can't remember for sure.

I just sent a small sample refrig that was in Mohr and then Dimock back to the warehouse.... do we really have to fix it? maybe just get rid of it.

Kevin - I think Rich Fetzer, Peter Schaul and I brought it back from Wheeling.

Rich - Am I remembering this correctly? Please, read below.

Glen,

Do you remember where the sampling refrig at the COOP came from? Its leaking so we are trying to figure out who is responsible to fix it (us or facilities). I think I remember taking it down there with my truck from the office when I just stop being an OSC. Let me know. Thanks.
